# Kaneohe - Kailua Wastewater Conveyance & Treatment F A C I L I T I E S P R O J E C T

A Project by the City & County of Honolulu  
Department of Environmental Services and Department of Design and Construction

## Public Informational Meeting Noise Variance for 24-hour Intermediate Shaft Construction

Southland/Mole Joint Venture (SMJV) and the City and County of Honolulu invite you to a public informational meeting regarding the 24-hour noise variance granted for the construction of the intermediate shaft at the Board of Water Supply Kapa'a Water Tank site for the Kaneohe/Kailua Tunnel Project, City and County of Honolulu Job No. W11-12.

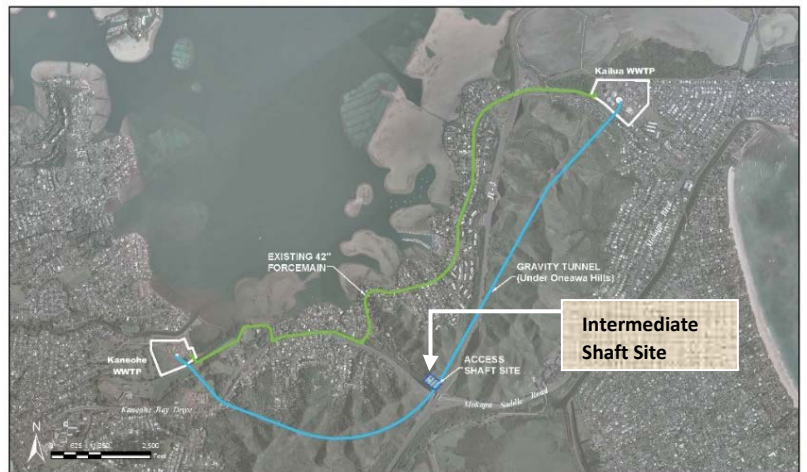

**Date:** *Thursday, December 1, 2016*  
**Time:** *6:00pm*  
**Location:** *Aikahi Elementary School Cafeteria*  
**Address:** *281 Iliha St, Kailua, HI 96734*

24-hour (except Sundays and on Monday mornings) intermediate shaft construction utilizing reverse circulation drilling (RCD) is anticipated to start in early 2017 and complete in late Spring of 2017.

Work will include operation of a pile-top reverse circulation drill rig, casing oscillator and power pack, hydraulic crane, water pumps, air compressors, generators and light plants. Equipment will have noise silencers, mufflers, and strobe lights will be utilized on equipment in lieu of backup alarms for night work.

Construction truck traffic will be limited to the hours after 8:30 AM and prior to 6:00 PM.

At the meeting, we will be presenting the project scope, objectives, schedule, and potential impacts to the community. We would also like to present the opportunity for residents to ask questions and express any comments and concerns you may have about the noise variance and intermediate shaft construction. Although some minor inconveniences may be unavoidable, our goal is to work with the community to minimize and/or mitigate these and shorten the duration of the project.

If you have any questions about this notice or the project, please feel free to contact the Construction Management Team via the project hotline at (808) 445-9079 or email us at [info@kktunnel.net](mailto:info@kktunnel.net)

*Mahalo for your patience and understanding.*
